

How to Choose the Right Cane

Step 1: Measure for the perfect handle height

Stand straight with arms at your sides. The top of the handle should align with the bend in the wrist.

Keep your shoulders level. If your cane side shoulder is higher, choose the next size down; if your cane-side shoulder is lower, size up.

Using a cane on the opposite side of an injury reduces limp, provides a natural gait, & helps you stand upright. However, you can use your cane on the injury side if it's more comfortable.

Step 2: Select your cane type

Offset

- Improves weight distribution
- Provides increased balance for those with wrist & grip issues
- Available in gel or foam grip

Wt. Cap.(lb.)	Handle Ht.(in.)
250–300	28.75–39
600*	37–46*

**Steel*

Straight-Handle/T-Handle

- Provides better grip & balance
- Reduces hand stress & fatigue
- Available in contoured grip only

Wt. Cap.(lb.)	Handle Ht.(in.)
300	27–39

Folding

- Discreet option that can be folded for storage or travel
- Available in contoured grip only

Wt. Cap.(lb.)	Handle Ht.(in.)
300–500	30.5–39.5

Quad

- Provides the most balance support with a quad base
- Available in gel or foam grip

Wt. Cap.(lb.)	Handle Ht.(in.)
300–500*	28–39.5

**Steel Base*

Know the benefits of each grip

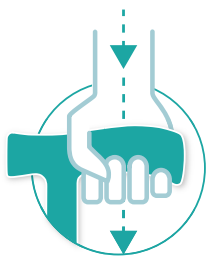

Foam Grip

- Suppresses vibration
- Durable & comfortable
- Easy to replace

Gel Grip

- Reduces hand stress & fatigue
- Provides cushioned comfort

Contoured Grip

- Ergonomic handle helps keep hand & wrist in neutral, stress-free position
- Provides added comfort & stability

Cane tip options

Standard Tip

- Helps absorb shock
- Features steel inner plate
- Provides complete contact with ground

Quad Tip

- Provides superior grip & absorbs shock
- Stands independently
- Lighter & more compact than base quad canes
- Offers balance & stability over all terrain

3-Point Flex Tip

- 360° grip & stability
- Stands independently
- Pivoting design increases contact with ground
- Offers balance & stability over all terrain

Replacement Tip

- Variety of styles to choose from including fun and functional options

Cane accessories

Ice-O-Grip™

- Installs on standard canes & flips up when not in use
- Stainless steel prongs provide stability & safety on icy terrain

HurryShield™

- Attaches to most mobility devices with elastic straps
- Contains mask, door opener, gloves, sanitizer & disinfectant wipes
- Keeps essentials within reach

Bling Cane Strap

- Soft flexible strap keeps your cane within reach
- Fun fashion for your cane
- 7" strap with quick connection
