A Wheelchair is covered if: Criteria 1, 2, 3, 4, 5, 6, are met; & Criterion 6 or 7 is met
The following criteria is 6 basic things needed to qualify for a manual wheelchair:

1. The patient has a mobility limitation that significantly impairs his/her ability to participate in one or more mobility-related activities of daily living (MRDAL) such as toileting, feeding, dressing, grooming, and bathing in customary locations in the home.

PLUS A mobility limitation is one that: Prevents the patient from accomplishing an MRADL entirely, or places the patient at reasonably determined heightened risk of morbidity or mortality secondary to the attempts to perform an MRADL; or Prevents the patient from completing an MRADL within a reasonable time frame.

2. The patient's mobility limitation cannot be sufficiently resolved by the use of an appropriately fitted cane or walker.

3. The patient's home provides adequate access between rooms, maneuvering space, and surfaces for use of the manual wheelchair that is provided.

PLUS 4. Use of a manual wheelchair will significantly improve the patient's ability to participate in MRADLs and the patient will use it on a regular basis in the home.

PLUS 5. The patient has not expressed an unwillingness to use the manual wheelchair that is provided in the home.

PLUS 6. The patient has sufficient upper extremity function and other physical and mental capabilities needed to safely self-propel the manual wheelchair that is provided in the home during a typical day.

OR Limitations of strength, endurance, range of motion, or coordination, presence of pain, or deformity or absence of one or both upper extremities are relevant to the assessment of upper extremity function.

7. The patient has a caregiver who is available, willing, and able to provide assistance with the wheelchair.

If the manual wheelchair will be used inside the home and the coverage criteria are not met, it will be denied as not medically necessary. If the manual wheelchair will only be used outside the home, it will be denied as not medically necessary.

K0005 - Ultra Lightweight Wheelchair

To qualify for a K0005 Wheelchair, patient must meet the criteria above AND coverage of an ultralightweight wheelchair (K0005) is determined on an individual consideration basis. If a K0005 wheelchair is provided and if there is insufficient information to support the need for this type of wheelchair, it will be denied as not reasonable and necessary.

Typical User:

The patient requires a seat width, depth, or height that cannot be accommodated in a standard, lightweight or hemi-wheelchair, & spend at least two hours per day in the chair

Qualifying Wheelchair(s): Cougar

Cougar Qualifying Accessories:

- Seat Cushions: 14880, 14887, 14907, 14908
